The Best of Self-Cleaning Units

Our Self-Cleaning Models have a permanent Micro-Tex filter that offers the most advanced filtration technology available and provides superior motor protection and dust-free operation (up to 99.9% efficiency.) The filter bag is lifted as the power unit is turned on. Once the power unit is shut down, the weighted self-cleaning filter drops and displaces the accumulated dust and deposits it into the dirt canister. Dirt canister is emptied as needed. All of our self-cleaning models feature the A.C.V. modular design. The quick release, lift-off motor module can be completely removed for servicing without the use of tools as shown on the back page of brochure.

MODEL	ACT II	ACT IV	HEAVY DUTY	KING III
Motor Construction	Metal/Plastic	Metal/Plastic	All Metal	All Metal
